Ms. Borgognoni, attached is the quote you requested on the 3COM switches. You may notice that I quoted you a 24 port 3300SM instead of the 12 port 3300 with a 1000 Base SX Fiber Module. This is because the 3300SM is a 24 port switch that comes pre-configured with a 1000base fiber uplink, resulting in a cost savings for you.

I am also including some information on the company and the various products and services we can offer you including free consultations, maintenance contracts, hardware/software sales, support, installation, and other services. We have recently opened a branch office in Cleveland, MS to better service all of your tech related needs and other districts in the Delta.

Additionally, I would like to schedule a time convenient with you to visit the school to better assess your needs with this project. Feel free to contact me if you have any questions or need any additional assistance.

Thanks and I look forward to hearing from you again.

Please excuse me for taking so long in replying to your request for additional information. We were out of school for Spring Break; I have also been out of town on school business; and the Mississippi Department of Education is having problems with the network and new email server.

There are two different SPIN changes covered in this fax. The new service provider completed work for both FRNs. I hope you can understand the information I have entered.

If you need to contact me, our phone system is also being repaired, please send email to carol@borgognoni.com or call our school's main office and leave a message for me. 662-621-4160.

Thank you for your help and I would like to apologize for all the problems we are having at our school.
